

FeedDemon Tips

Newspaper and Browser Tips

- Hold **CTRL** while clicking a hyperlink to open it in a new browser tab
- Hold **CTRL** while scrolling the mouse wheel to change the browser's font size
- Close a browser tab by double-clicking it
- Close a browser tab by middle-clicking it
- Re-arrange browser tabs by drag-and-dropping them
- Move between browser tabs by pressing **CTRL+TAB** and **SHIFT+CTRL+TAB**
- Move the mouse over a hyperlink to show its URL in the status bar
- Drop down the address bar to revisit a page you've already browsed
- Move the mouse over a browser tab to show the full title and address of the page
- Open the current page in your default browser by selecting **Browse > Show in External Browser**
- Open a hyperlink in your default browser by right-clicking it and choosing **Open in New Window**
- Visit your browser's home page by pressing **ALT+HOME**
- Visit the home page of the current feed by clicking its title in the newspaper
- Search the current page by hitting **Ctrl+F**
- Change the number of articles to show in a newspaper page by going to the *Reading* tab in FeedDemon's options
- Change the sorting of articles in the newspaper by selecting **View > Newspaper > Sort in Reverse**
- Focus FeedDemon's address bar by pressing **ALT+D**
- Click the feed icon at the top left of a newspaper to mark every article in it as read
- In the address bar, type *define:* followed by a keyword to get a definition of that keyword (ex: *define:spam*)
- Print a newspaper page by right-clicking in it and selecting **Print**

Subscription Tips

- Find any feed you're subscribed to by selecting **Keyword View** from the **Views** drop-down above your subscriptions
- Find new feeds by clicking **Subscribe** and then typing a keyword instead of a feed URL
- Hide your subscriptions by pressing **Ctrl+F11**
- Prevent older articles from appearing in a feed by enabling the **Ignore new items older than** setting on the Advanced tab of the feed's properties
- Move a feed by drag-and-dropping it between folders
- Prevent a feed from showing up in the attention report and popular topics by disabling **Collect attention data** in the feed's properties
- Copy a feed URL to the clipboard by right-clicking the feed, then selecting **Copy > Copy Feed Address**
- Import your feeds from Bloglines by selecting **File > Import Feeds**, then choosing **Import from an external source** and selecting Bloglines
- Select **Tools > Search Subscriptions** then right-click the search results to convert them to a watch or clippings folder

FeedDemon Tips

Clippings Tips

- Add any hyperlink to a clippings folder by drag-and-dropping it from your external browser (or from FeedDemon's own browser)
- Drag-and-drop a FeedDemon browser tab into a clippings folder

Watch and Search Tips

- Change the search provider by clicking the arrow to the right of the search toolbutton (above the browser)
- Disable a FeedDemon watch by right-clicking it and removing the **Enabled** checkmark
- Clear a watch and run it again by right-clicking it and selecting **Rerun Watch**
- Add a minus sign to a watch keyword to exclude articles which contain that keyword

General Tips

- Expose hidden toolbuttons by clicking the arrow at the far right of any toolbar
- Change the sounds used for specific events by clicking the **Sounds** button in FeedDemon's options
- Assign keyboard shortcuts to many features by pressing **Ctrl+K**
- See how many total feeds, items, unread items and flagged items you have by right-clicking the root Subscriptions folder, choosing **Folder Properties**, then switching to the **Statistics** tab
- Toggle which actions to confirm by clicking the **Confirmations** button in FeedDemon's options
- Decrease the amount of memory and storage space FeedDemon uses by right-clicking the root **Subscriptions** folder, selecting **Folder Properties**, adjusting the **Archiving** setting (try 100 instead of 200), then choosing **Apply to ALL feeds in ALL folders** after pressing **OK**.
