

RELEASE NOTES – TOOLBAR

Build: 1.5.3.233

Date: Feb 25 2008

BUG FIXES.

- Fixed: Toolbar button enabled too often in IE (False positive) when discussion button was disabled.
- Fixed: Wikipedia and some other sites would not return feeds because there was no UserAgent string. Added a UserAgent.
- [127518](#) - Fixed: Button would occasionally flash on, and then stay off.
- [127516](#) - Fixed: Did not detect feeds on NGES Feeds Page.
- [127695](#) - Fixed: some options not shown in FireFox dropdown menu when using "mini" toolbar
- Fixed: Auto discovered links were not passed to the subscriber in Vista with UAC enabled.
- Fixed: In some cases, the IE toolbar would indicate a greater number of discussion links than actually displayed.
- Fixed: Feeds with a space in the type were not found (Factiva) - type="application/rss+xml"
- Fixed: IE 7 - the subscribe option context menu caused an error.
- Fixed: When subscribing to a SharePoint feed that used NTLM, the toolbar did not prompt for credentials.

FEATURES.

- [109533](#) – Added proxy support

CHANGES.

- Took out passing URLs on the command line that get found in the IE toolbar
- Subscribe option in the context menu now uses JavaScript instead of Visual Basic
